

mr. 24

sedus

Comfortable leather-covered headrest and pleasantly soft upholstery, chromed support; height can be adjusted by 50 mm.

Easy-care multifunctional headrest with textured imitation leather cover, black powder-coated support; tilt and height can be adjusted by 50 mm.

Extremely robust arm-rests, optionally leather-covered. Lockable in every position; easy adjustment of height (110 mm), depth (80 mm) and width (2 x 50 mm inwards and outwards to regulate the available sitting width) without tools.

The backrest can be tilted by up to 32 degrees and is lockable in virtually any intermediate position. The generously sized upholstery comes, just like the seat, with all-round edge protection.

Sturdy and comfortable upholstery with raised stitching for optimal pressure distribution, all-round frame made of PUR to protect the edge of the upholstered seat, adjustable sliding seat (400 to 460 mm, or the larger version at 435 to 495 mm).

The height and depth of the robust Schukra lumbar support can be quickly adjusted to suit any body weight and size using the perfect operating elements.

Sedus mr. 24

Workstations which are used on a continuous basis, for example in control rooms, place extreme demands on office seating. When developing the Sedus mr. 24 swivel chair, these demands became reality thanks to perfect ergonomics, exacting quality standards and maximum robustness.

The seat and backrest upholstery is not only generously sized, but also extremely sturdy. The adjustment functions are particularly user-friendly and long-lasting. Even for users weighing up to 200 kg, Sedus mr. 24 is the perfect choice for use right round the clock.

The Tec fabric is ideal for the upholstery since it is non-wearing and extremely resilient. The chair is also available in the crêpe and leather collections.

“Similar” mechanism

The mechanism provides synchronous movement of the seat and backrest with the body, individually adjustable backrest pressure, perfectly balanced force distribution due to the use of mechanical springing, and a particularly large opening angle of up to 32 degrees.

Seat height adjustment

The Sedo-Lift mechanism provides excellent suspension and includes a telescopic tube that protects against dirt particles.

Visual features

10 shades of leather, 8 colours of Tec fabric, 12 colours of crêpe fabric, 3 five-star base designs (chromed, polished, black), Castors with 65 mm diameter

Sedus mr. 24 satisfies the following demands:

- Certificate of Safety Approval
- Certificate of Ergonomics Approval
- British Standard 24h
